# Solar Power Generation vs. Forecast

## Solar Power Generation +1% vs. Forecast

FY18/6 H1 Power Generation and Power Production Revenue (15 Power Plants)

\* Forecast power generation is a third-party, 50% probability mean annual production forecast (P50 forecast) that serves as the base forecast for each solar power plant's operating plan.  
 Power production revenue is total power sales to power purchasers (electric power utilities). Power production is seasonal, being lower in June due to Japan's rainy season and in September through February due to fewer productive daylight hours during autumn/winter.

# Solar Power Generation (YOY)

- 2 Accretive Power Plant Acquisitions on Jul 3, 2017 (current total: 15 Plants)
- Power Generation +15.6% YOY

## ■ Ichigo Structure

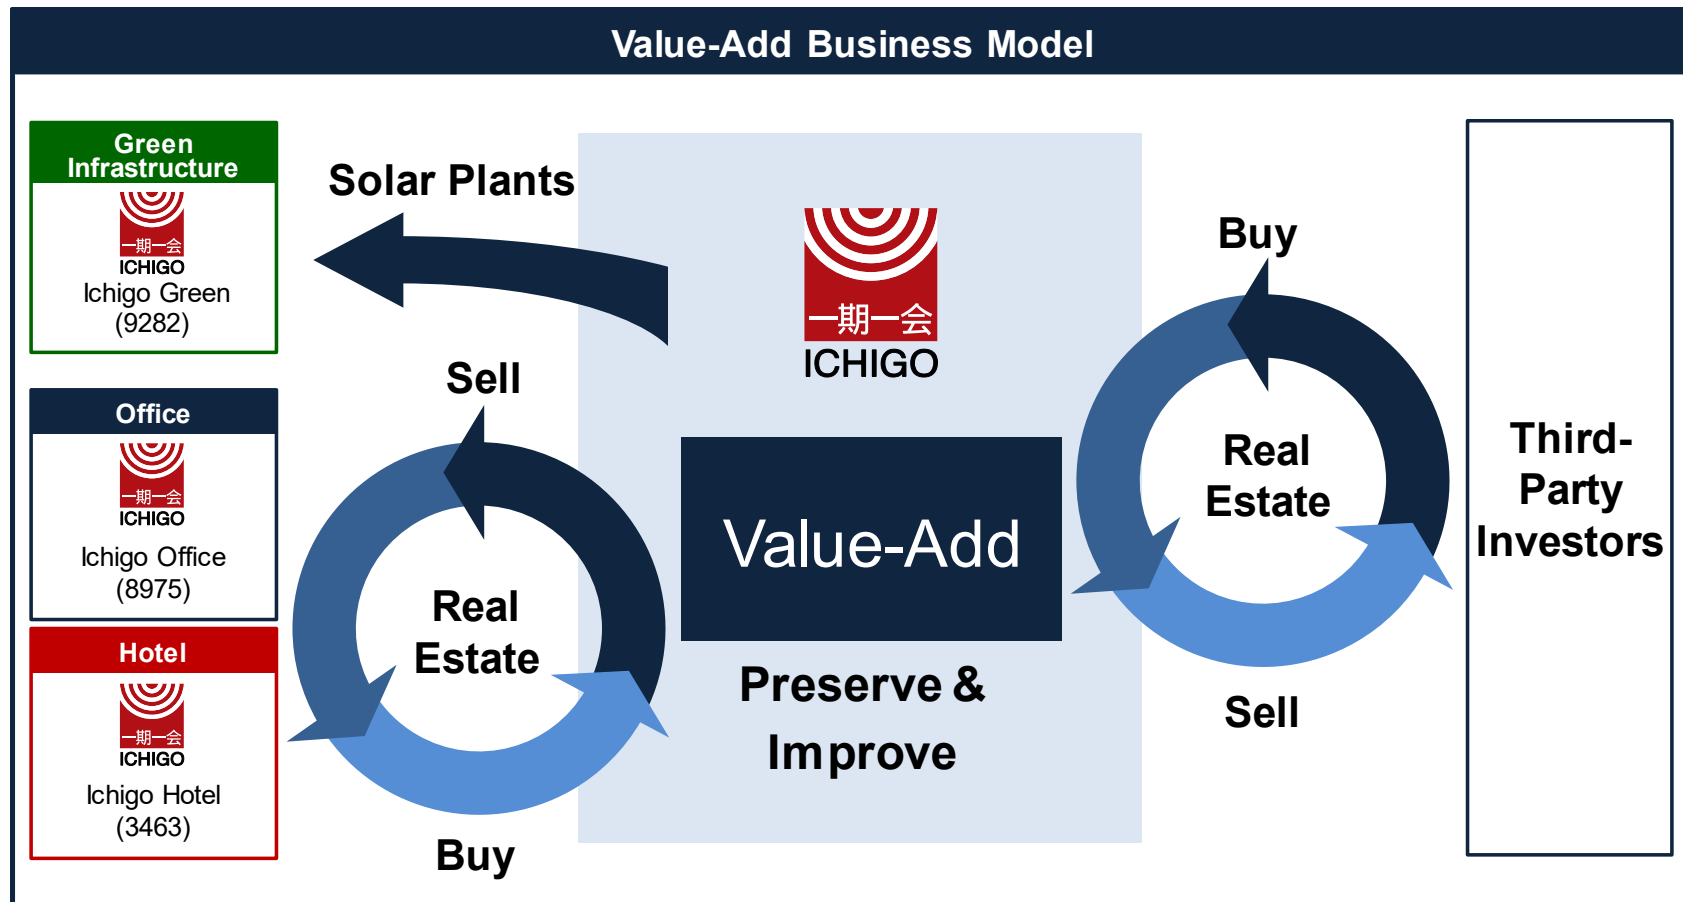

The word "Ichigo" comes from the ancient Japanese proverb, Ichigo Ichie, literally meaning "One lifetime, one encounter." The phrase was first used by a 16th century master of the tea ceremony, Sen no Rikyu. He called upon his disciples to give total focus and sincerity to each act of the tea ceremony for every guest, because that particular moment will only exist once and must be fully lived and realized.

Ichigo embraces the Ichigo Ichie philosophy of sincerity and service, and works to build strong long-term relationships to support the success of our clients, shareholders, and all stakeholders.
