November solar power generation was 2,195,201kWh, 3% above the P50 forecast.<sup>1</sup>

<sup>1</sup> Forecast Power Generation is a 50% probability mean annual production forecast (P50 forecast), calculated by an independent, third-party technical consulting firm, that serves as the base forecast for each solar power plant’s operating plan.

<sup>2</sup> CO2 reduction is calculated as 0.66kg CO2 per kWh.
